### **Engineering Education Foundation, Pune**

I am the Founder President and President of the Engineering Education, Pune from 1996 to 2014. During the period I devoted my total attention for the betterment of the Engineering Education and brought out a few documents for the benefit of Engineering Education / for Engineering colleges and Polytechnics. These are applicable to colleges not only in Maharashtra, but throughout the India.

I hope the Principal's of Engineering Colleges and Polytechnics will study these documents in depth, and make use of it for quality improvement in their institutions

I expect the Principals / Directors / Heads of the institutions to have a open mind and always to have an urge for the betterment of the Institution if he gets some suggestions, like the one I have given below, expect him to duely consider it and if he finds it beneficial to his institution, he should implement these and take a regular review and make corrections if necessary. It would be most welcome if he can give feedback on his working out the suggestion that he has received from some one, like me.

- A) 1) Student – Teacher contact Scheme for an educational institute
- 2) Centre of Quality and Excellence
- 3) Consortium of Engineering colleges and Polytechnics
- 4) Role and Responsibiltes of Engineering faculty
- B) Engineering Teachers Day---- 10<sup>th</sup> September of the year
